Active Vibration Isolation Elements
halcyonics_vario/variobasic series

ABSTRACT
The Vario systems are element-based modular vibration isolation systems, consisting of two isolation elements and external control unit. The product groups in two models: Vario and VarioBasic.

The Vario isolation elements come with automatic load adjustment. They are ideal for changing loads or applications that do not offer access to the isolation system. This model is limited to two isolation elements for loads up to 360 kg.

The second version available is the VarioBasic, which has especially been designed as a cost-effective isolation system for high static loads. In contrast to the Vario, it can consist of more than two isolation elements. A set-up of six elements for example is able to isolate loads of up to 900 kg. This isolation system needs to be manually adjusted prior to the use. Later on there is no further tuning or adjusting required.

The compact dimensions and versatile options of usage make this product series ideal for installations in customer-specific applications. An example of use is the combination with an optical breadboard. It serves as mechanical link between the isolation elements and can be used for laser set-ups for instance. There are virtually no limits in applications offered by Vario systems.

APPLICATIONS
- Laser set-ups
- Interferometers
- Ellipsometers
- Patch-Clamp applications
- UHV scanning tunneling microscopes
- Scanning electron microscopes
- Langmuir-Blodgett troughs
- Nanoindenter
- Optical profilers
- LCD manufacturing
- Disc mastering

FEATURES & BENEFITS
- Active vibration isolation starts at 1 Hz (passive isolation above 200 Hz)
- Isolation in all six degrees of freedom
- Wide range of standard sizes and customizations available
- Automatic load adjustment and transportation lock for the Vario systems
- Comfortable manual load adjustment for the VarioBasic
- Modular design
- External control unit
- No maintenance required
- No natural low frequency resonance and, as a result, excellent vibration characteristics also in frequency ranges below 5 Hz
- Flexile to use
- No compressed air supply is needed, AC power from an electrical outlet is sufficient
- Excellent position stability and stiffness
- Low voltage electromagnetic actuators
- Two-year warranty
- Long term tests and quality control procedures
ACCESSORIES AND OPTIONS

- Acoustic enclosures
- Various breadboards with or without mounting holes (M6/25 or 1/4-20")
- Steel support frame
- Rack mountable external control unit
- Custom versions available

Transmission graph of the halcyonis_vario_60 measured at a velocity of 100 µm/s with a payload of 50 kg (110 lbs)

Typical settling time below 0.3 sec

VarioBasic_40 load adjustment

**ISOLATION TECHNOLOGY:** halcyonics_active vibration isolation technology based on piezo-electric type acceleration pickup, fast signal processing and electro-dynamic force transducers.

**CONTROL ELECTRONICS VARIO:** Easy-to-navigate menu for all settings, second graphics display for vibration level sensor

**CONTROL ELECTRONICS VARIOBASIC:** External control unit with sensor and actuator LEDs, corresponding to force directions

**FORCE DIRECTIONS:** Active compensation in all six degrees of freedom

**ISOLATION PERFORMANCE:**

- >5 Hz = 25 dB (94.4%)
- >5 Hz = 25 dB (94.4%)
- >10 Hz = 35 dB (98.2%)
- >10 Hz = 35 dB (98.2%)

**ACTIVE BANDWIDTH:** 1.0 - 200 Hz**

**SETTLING TIME:** 300 ms***

**STROKE OF THE ACTUATOR:** 1 mm

**MAXIMUM CORRECTION FORCES:**

- **V** ± 8 N
- **H** ± 4 N

<table>
<thead>
<tr>
<th>(V = Vertical, H = Horizontal)</th>
<th>V ± 16 N</th>
<th>H ± 8 N</th>

**MAXIMUM COMPENSATION LEVEL:**

- 550 µm/s at 8 Hz + 150 kg (330 lbs)***
- 300 µm/s at 8 Hz + 300 kg (660 lbs)***

**LOAD CAPACITY VARIO:** 0 - 360 kg (0 - 790 lbs)

**LOAD CAPACITY VARIOBASIC:** 0 - 300 kg (0 - 660 lbs) 0 - 600 kg (0 - 1320 lbs)

**REPEATABILITY OF LOAD ADJUSTMENT VARIO:** 60 µm

#### INTERFACE VARIO

- USB service interface

#### INTERFACE VARIOBASIC

- BNC analog diagnostic output - 50 Ω

### ENVIRONMENTAL AND OPERATIONAL REQUIREMENTS

#### ELECTRICAL VOLTAGE:

100 - 250 V / 47 - 63 Hz

#### POWER CONSUMPTION VARIO:

Typically 35 - 50 W; max. 70 W

#### POWER CONSUMPTION VARIOBASIC:

Typically 10 - 20 W; max. 50 W

#### OPERATING TEMPERATURE:

10 - 40°C / 50 - 104 °F

#### RELATIVE HUMIDITY:

0 - 60%

#### OPERATING ALTITUDE:

< 2500 m / 8100 ft

### CERTIFICATION

#### ELECTRICAL SAFETY:

CE certified according to directive 2006/95/EC

#### EMC:

CE certified according to directive 2004/108/EC

---

* Consists of four isolation elements and a 4-port control unit.

** Floating table top is supported by steel springs; low-pass characteristics of spring-mass combination dominates the dynamic behavior above 200 Hz.

*** The settling time and maximum compensation level depend on several conditions, such as payload, frequency, load distribution and height of the payload. For that reason this value should be considered as an estimation.
